Founded in 1973, Tol-Co, Inc. enjoys a reputation of being the premier supplier of job-site tooling and equipment sales, rental and service to the construction industry. Our primary concern is to make sure our customers have all of their needs handled in the most proficient manner possible.

We accomplish this by keeping an inventory of the most often required pieces of equipment on hand for prompt deployment. We also are available for on-site inspections, service and repair – at your convenience, not ours.

There are many aspects of the Tol-Co business. The first is equipment sales. We pride ourselves on the relationship we have not only with our customers, but with a vast array of manufacturers.

On many occasions, the customer wishes not to buy the piece of equipment he or she is in need of. On these occasions, it probably makes sense to rent the needed piece from Tol-Co. Our comprehensive rental business is second to none.

Tol-Co is well-known as a source for unusual specialty services to those who don't care to "tool up" for a job they seldom do.

Finally, Tol-Co offers a repair service which can be executed either at the customer's location or at Tol-Co.

Whatever the need, we specialize in fast response and complete accommodation to our customers. After all, the sooner we make you a satisfied customer, the better for us all!
